

In 2020,

In 2020, I will be an adult and I will be just finishing my studies.

I will be an animal care animator or a physical therapist for animals.

The world won't change because it will be in eight years but I hope there will be less misery in the world and we will find sources of water in Africa.

I will be part of ALF, it is an association for animals, because I will be a vegan!

I won't have kids.

In 2020, I will live in Canada for three months and then, I will go back to France to see my family.

Human beings will be green.

I will be green too.

Extra-terrestrials will live on Earth.

They will take me away and I will live on the moon.

On the moon, there will be rock everywhere, but there will not be lots of human beings.

I will have two kids, and a husband.

My wedding will happen on Mars, the red planet.

The Futur

**In the future, in 2020, the world will collapse into chaos.
Extra-terrestrials will break everything on their way.
The day will not rise up anymore.
The Human race will disappear.
A tsunami will submerge the American coast.
The world will burst because of an asteroid.**

In 2012, there will not be drinking water and food anymore. There will be only a few human beings left. The rest of human beings will feed with plants, and dehydrated food such as astronauts use. There will be no more animals, there will be many villages on fire and there will be floods. I will live in a house in a tree far from the city, I will have my car driver's licence. I will be married and I will have two kids, a girl named Cathy and a boy named Mathieux. More and more extraterrestrials will arrive on Earth.

Charline.S

In the future, the moon will be inhabited by human beings.

In 2015, everything will be electronic.

In 2016, economic misery will be over.

In 2020, I will be rich.

In 2040, I will be a sheep.

In 2041, the Earth and Mars will hit each other.
